Outcomes for independence

MyPATH is designed to promote independence and to respond to individual interests and choices using an innovative curriculum framework.

MyPATH is a suite of outcome-focused programs that are supported by an extensive customised curriculum based on best practice research. Each session guides the participant through a range of activities and experiences developed to build and maintain independence skills.

All programs are mapped to align with each participant's personal goals. The MyPATH customised system enable teachers and instructors to track and to report on an individual's progress towards achieving their goals.

The methods used to deliver MyPATH focus on supporting every participant to achieve their maximum potential. The curriculum has been developed by teachers with experience working with and supporting people to learn and to maintain the skills they need to access and contribute to their community as independently as possible. Sharing passions with others in a group environment develops a strong peer network that enhances engagement and learning and builds confidence. As confidence grows participants practice their newly acquired skills in their home environment and in their local community.

MyPATH is one of a number of MyPLAN products designed by St Laurence Community Services Inc. to offer a greater variety of choices to people who are in receipt of NDIS funds.
